8 Tips for Engagement Ring Care

For women who aren’t accustomed to wearing fine jewelry on the regular (which, let’s be honest, is most of us), rocking a pricey diamond for the first time is a bit like babysitting a newborn. You’ll look down at your sparkly new addition and have a lot of questions about engagement ring care: Should I wear it to sleep? Take it off when I shower? Can I really clean it with dish soap?

All valid questions! Since an engagement ring will likely be the most expensive piece of jewelry you’ve ever owned, it’s no wonder that many newly engaged women feel clueless about how to incorporate it into their daily lives. Here, a few insightful tips from industry experts.

1. *Clean your ring regularly.*

“Buildup of dirt or oil will block the light interactions in the stone, so there’s no point in having a beautifully cut diamond if it’s going to be dirty,” says Tom Burstein, Christie’s international jewelry director. “If you’re not cleaning it, then you’re not doing the stone justice because it’s not living up to its potential.” Luckily, cleaning your ring isn’t a labor-intensive process—just drop it into a mug of warm water mixed with a few drops of soap or mild dishwashing detergent. Let it sit for a few minutes (or even overnight), then gently scrub the stone and basket with a soft-bristled baby toothbrush, rinse, and pat dry. Burstein recommends cleaning it at least once every few weeks, and when you do, “make sure you cover the drain!”

2. *Diamonds are tough—but not invincible.*

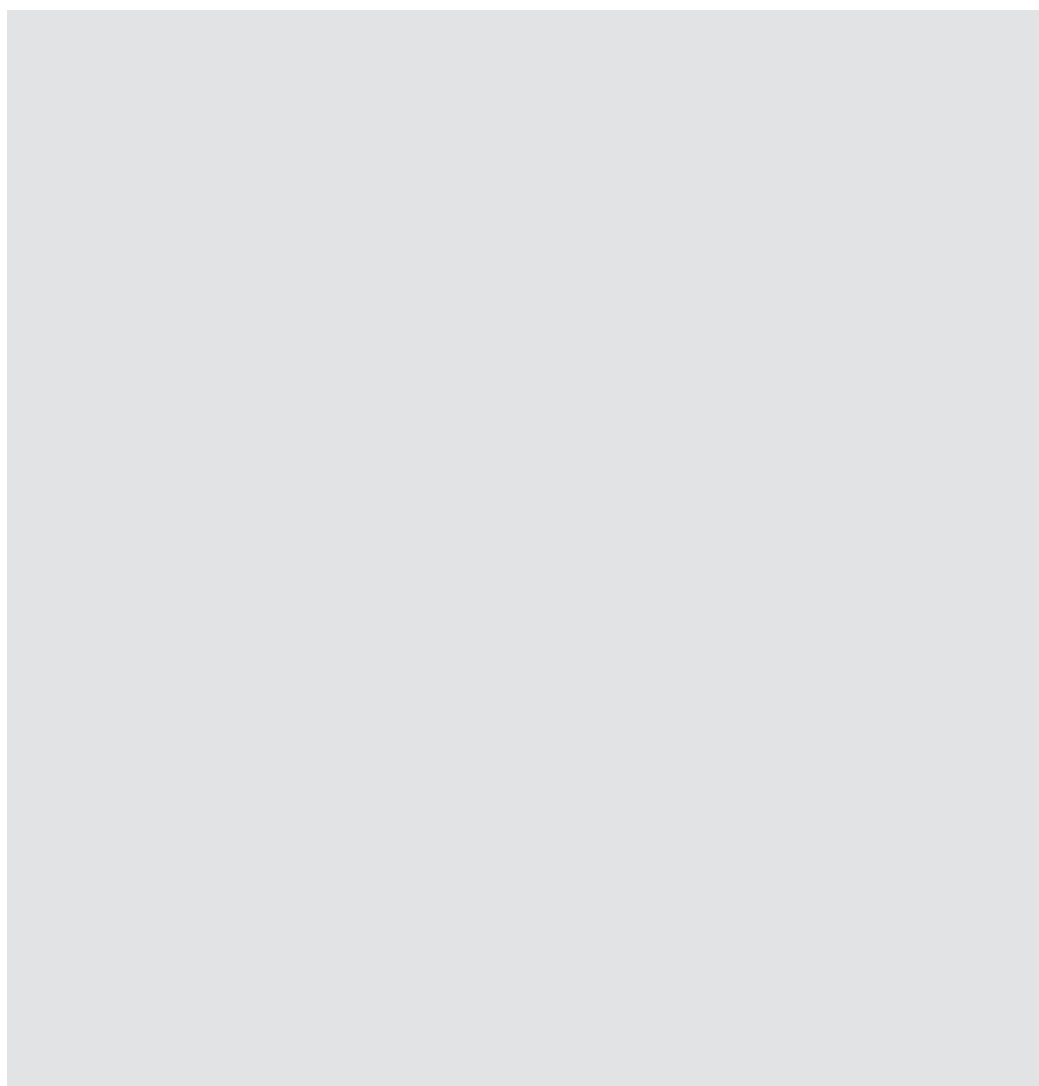

Perhaps you’ve heard that it’s impossible to damage a diamond? Not true, says Burstein. While the stones are considered the hardest naturally occurring metal in the world, they can still fracture, bruise, and chip. And Burstein explains that it’s not a function of time either: “Prong mountings are very secure and it takes a pretty aggressive knock, but it happens. I’ve seen a month-old ring with a big chip in it,” he says. “It’s like driving a new car off the lot and getting rear-ended.”

3. *Know when to leave your ring on and take it off.*

Sure, it’s tempting to slip your ring off every time you wash your hands, but try and resist the urge, says Daniela Balzano-Hull, the New York store director for De Beers. “It takes a while to get used to having this beautiful ring, and you want to protect it as much as you can, but so many brides end up washing their hands in a restaurant and leaving the ring behind.” Still, there are other occasions that experts recommend going ringless—like a day at the beach. Balzano-Hull warns that swimming can greatly affect your body temperature, causing your finger to shrink in size. The rules for when you should and shouldn’t wear your diamond also depend on the type of stones you have, adds Burstein.

I’ve seen a month-old ring with a big chip in it,” he says. “It’s like driving a new car off the lot and getting rear-ended.”

3. Know when to leave your ring on and take it off.

Sure, it’s tempting to slip your ring off every time you wash your hands, but try and resist the urge, says Daniela Balzano-Hull, the New York store director for De Beers. “It takes a while to get used to having this beautiful ring, and you want to protect it as much as you can, but so many brides end up washing their hands in a restaurant and leaving the ring behind.” Still, there are other occasions that experts recommend going ringless—like a day at the beach. Balzano-Hull warns that swimming can greatly affect your body temperature, causing your finger to shrink in size. The rules for when you should and shouldn’t wear your diamond also depend on the type of stones you have, adds Burstein.

Ring Size Guide

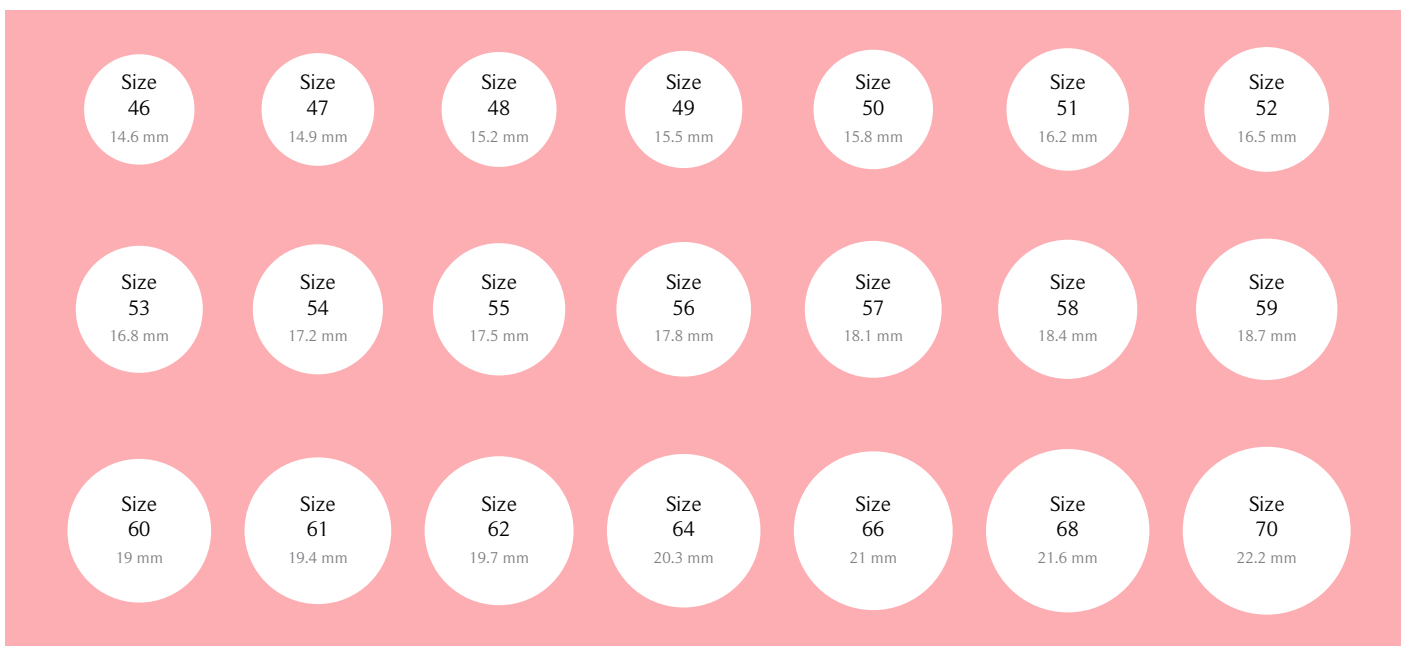

To get the best results, you will need to go to the 'printing settings' before printing and ensure that the 'page scaling' option is set to 'none' in the print dialogue box. The Ring Size Chart must be printed on a full letter "A4 (21x29.7 cm)" size page. To check that the Ring Size Chart has been printed properly, take a ruler and measure the sample below. It should measure exactly 2 cm.

Option 1

Measure By Matching Your Ring

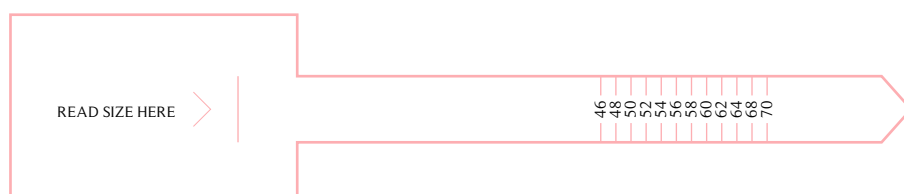

To find your ring size, use an existing ring that fits you well. Match the inside of that ring with one of the circles below. When your ring has been placed on the right size, you should see only white circle - and no pink space inside your ring. If your ideal fit falls between two sizes, we recommend choosing the bigger size.

Option 2

Measure with the Modern Diamond Ruler

After you cut out the ruler, carefully cut the line to create a slit. Wrap the ruler around your finger at the base and pull the tapered end through the slit. To make sure the ring will fit comfortably, we suggest also measuring your knuckle. We recommend selecting a size that goes on and off your finger easily.

Diamond and gemstone eternity rings with a specific number of gemstones per finger size; milgrain or ornate bands, some silver rings, or rings with alternative metals such as Tungsten cannot be resized. We are happy to exchange your ring for another size within 30 days of purchase. It is important to note that should you opt for an exchange, your new ring may contain a different number of gemstones, diamonds, or a reduction or increase in precious metal weight which may cause a change in the price.

How Do I Care for my Jewelry?

Over time, fine jewelry can become a treasured family if it is cared for properly. Dust, pollution and daily wear all conspire to cloud the brilliance of gemstones. The surface of gold, platinum and silver jewelry can become dulled. Timeworn prongs and clasps can result in the loss of a stone or an entire piece of jewelry.

Professional cleanings are recommended as often as once a year. We encourage you to bring your jewelry back to us for professional servicing. Our staff is knowledgeable and experienced in all aspects of jewelry care, including cleaning gemstones, restringing pearls and repairing clasps and earring backs.
